DETAILED ACTION

Drawings

1. The drawings filed February 23, 2006 are objected to because it is not possible to read the text in figures 3-5. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. Claims 1-19 are rejected under 35 U.S.C. 102(e) as shown in paragraph 3 of the office action mailed August 26, 2005.

Election

3. Newly submitted claim 20 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The originally claimed invention fails to teach or suggest the language in claim 20 of a plurality of electronically-stored knowledge resources containing information characterizing the deliver of the process model elements and to allow the model to be updated as necessary over time.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 20 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Conclusion

4. Applicant's arguments filed 2/23/06 have been fully considered but they are not persuasive.

Applicant argues at page 8, lines 19 and 20 that "the '119 Beck et al patent does not provide a process model but instead provides an object model". However, '119 Beck et al discloses "process model" (see col. 10, lines 40 and 41).

Further more other arguments are mainly based on the issue that Beck et does not disclose process model.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
